

Garlic armchair

WAXMAN

Inspire your office

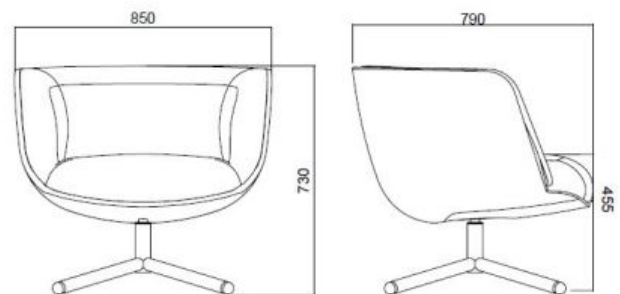

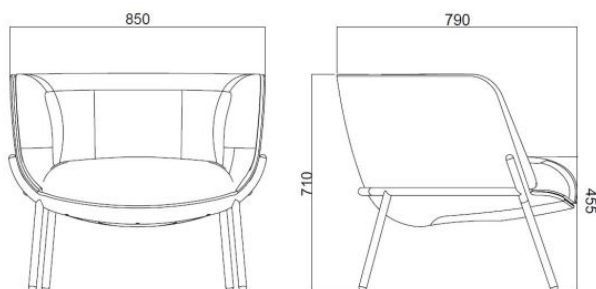

Bernhardt Design collaborated with designer Francesco Favaretto of Favaretto & Partners Design Studio to create the Garlic line. Garlic has the ability to both catch your eye and invite you into rest. On the outside is a hard, durable shell held together by a structure of 25mm diameter steel tube that comes in different finishes: painted, chromed or anodized. Inside, you will find soft, pillowy, removable cushions available in a wide array of textural fabrics and rich colors. Favaretto & Partners aim to ensure the accessibility of places and objects to the widest range of users. Garlic fits perfectly in any room or environment due to its size and varied finishes and is sure to wow your guests with both its style and comfort.
