## TITAN LS-420

Simple, modern and innovative with 360° swiveling seat, Titan provides practicality, durability and versatility for today's classroom.

Designed with the busiest of educational settings in mind, Titan can be placed in pairs in straight or curved rows, working well whether on steps or a flat floor.

# TITAN BENEFITS

## Innovative system

The desk space is generous, providing sufficient space for up to four students, as the swivel seats rotate 360-degrees, and move forward and backward on a pivoting aluminum arm.

This innovative system allows for co-working and collaborating between rows, freeing students up from previously restrictive lecture hall seating.

## Seat & back

The seat was designed in contoured comfort with a curved backrest and comfy, yet tough, seat cushion. The seats also smoothly retract automatically once the student has left – ideal for keeping aisles clear, excellent for saving space, and exceptional for easy maintenance.

# OPTIONS

## Front Panel

Front panel is available in particle board with laminate finish or perforated steel.

Go contemporary with a perforated steel panel.

Keep it understated and natural, by choosing the particle board front panel with wood veneer.

## Optional Without Panel

The most minimalist style which is excellent for saving space.

## Electric Power Supply System

Powering the learning of students is an electric power supply system- providing convenience for the increasing amount of learning technology, from tablets to laptops.

**Table top**
