

XL+

MUCH MORE THAN AN EXECUTIVE CHAIR

DILE

ELEGANT, MODERN, ENVELOPING,
FLUID AND EXCEPTIONALLY COM-
FORTABLE, THE XL+ OFFERS STATE-
OF-THE-ART TECHNICAL FEATURES,
INCLUDING A HEIGHT-ADJUSTABLE
BACKREST AND ADVANCED ERGO-
NOMIC TECHNOLOGY.

*Designed
by Dilestudio*

The XL+ collection combines the aesthetics of an executive chair with the performance of a premium task chair. Drawing inspiration from the classic executive armchair, its design has been redefined to incorporate the ergonomic qualities of modern office seating. This was shaped by an in-depth study of today's workplaces, where managers play an active role within their teams and proximity has become essential.

XL+

THE CRAFTED ESSENCE OF COMFORT

The upholstered seat combines unique aesthetic and technical qualities. It combines the resilience of foam injected with the AIR SOFT system with a layer of memory foam to create a remarkably pleasant sitting experience.

Each XL+ chair is upholstered by hand with meticulous attention to detail. The stitching, inspired by nature, gives the chair a sophisticated and distinctive character.

XL+ REINVENTS ITSELF: WHERE ELEGANCE MEETS VERSATILITY

A new addition to the range is the half-back upholstered version, which complements the classic high-back option.

The new low-back XL+ version is available as a fully upholstered office chair that combines elegance with the operational performance of a true task chair.
